[CHAPTER 01 - TIER 1 / FOUNDATIONAL DOCTRINE]

BRAND FOUNDATION

Essence · Positioning · Promise · Personality Attributes · Voice · Brand Archetypes — The load-bearing architecture of the Tempist identity. Handle with care. No modification without Brand Architecture authorization.

01

1.1 BRAND ESSENCE

Tempist Systems is **sovereign force, made inevitable** — the convergence of autonomous intelligence and kinetic precision into infrastructure that does not ask permission.

1.3 BRAND PROMISE

When Tempist is deployed, the sky belongs to the mission. Every time.
No exceptions. No renegotiation.

1.2 BRAND POSITIONING

FOR

Sovereign governments, defense ministries, and institutional capital that require air superiority without compromise—

TEMPIST SYSTEMS IS

The autonomous counter-threat infrastructure company that renders aerial swarm threats operationally obsolete—

BECAUSE

We are the only system that has already operated in live combat, at scale, with zero dependence on human reaction time.

[BRAND PERSONALITY – 1.4]

PERSONALITY ATTRIBUTES

I. SOVEREIGN AUTHORITY

Tempist does not ask for a seat at the table. The table was built because Tempist exists. The posture of a system that has been combat-proven, backed by sovereign capital, designed for permanence.

IN ACTION:
Declarative. No hedging. Statements of fact.

NOT THIS:
Aggression or the performance of confidence.

II. OPERATIONAL PRECISION

Every word, every visual, every system output: specified, measured, intentional. Precision is the operational DNA of a company whose product must function correctly the first time.

IN ACTION:
Monospace data. Copy stripped to load-bearing core.

NOT THIS:
Sterility for aesthetic effect.

III. QUIET INEVITABILITY

The weather does not campaign for adoption. It arrives. Tempist communicates with the patience of a system that understands the arc of history is already bending toward its necessity.

IN ACTION:
No urgency. No pressure tactics.

NOT THIS:
Passivity or aloofness.

IV. CLASSIFIED INTELLIGENCE

Tempist has access to information its audience does not. It has seen the threat models, operated inside the engagement envelopes. This creates epistemic authority — the brand knows something.

IN ACTION:
Selective disclosure. Technical specificity when relevant.

NOT THIS:
Obscurantism to conceal weakness.

[BRAND PERSONALITY — 1.4 CONTINUED]

V.
MACHINE PATIENCE

Tempist does not react. It executes. Swarm systems respond in milliseconds; the company operates across strategic years. Both are correct — dual temporal registers of defense infrastructure.

VI.
LETHAL ELEGANCE

The most dangerous systems in history have been, by design, beautiful. T.E.M.P.I.S.T. is elegant because it is fully optimized. Elegance in Tempist is always functional — never decorative.

VII.
IRREVERSIBILITY

Tempist represents a threshold event. Before its deployment, a sovereign operates in one threat environment. After, that environment has fundamentally changed. The brand carries the gravity of transformation.

1.5 BRAND VOICE — TONE DESCRIPTORS

01
DECLARATIVE

02
PRECISE

03
CLASSIFIED-DRY

04
SOVEREIGN

05
COLD-CERTAIN

06
MINIMAL-WEIGHT

[BRAND VOICE – 1.5]

DO / DON'T

// TEMPIST SPEAKS LIKE THIS

"Tempist operates where human reaction time is no longer an asset."

"The swarm does not negotiate. Neither do we."

"Deployed. Combat-proven. Available for sovereign procurement."

"Before Tempist. After Tempist. These are different threat environments."

"The threat is real. The system is ready. The question is authorization."

"We are the weather. We do not forecast ourselves."

"Sovereign. Autonomous. Irreversible."

// NEVER LIKE THIS

"Our AI-powered platform enables faster threat response!"

"We're disrupting the counter-drone market with next-generation solutions."

"We're excited to offer our cutting-edge technology to government partners!"

"Tempist is changing the game in autonomous defense systems."

"Contact us today to learn how Tempist can transform your capabilities!"

"Tempist — the innovative, scalable solution for modern air defense challenges."

"Next-gen. Agile. User-friendly."

[BRAND ARCHETYPES — 1.6]

THE RULER × THE MAGICIAN

PRIMARY ARCHETYPE

THE RULER

The Ruler governs from the position of legitimate authority. Rulers do not compete — they preside. They don't pitch — they authorize. Tempist is an infrastructure provider at the sovereign level. Its customers are governments. Rulers speak in mandates. They define the conditions under which others operate.

// Declarative voice · Classified-document aesthetic · No urgency language

SECONDARY ARCHETYPE

THE MAGICIAN

The Magician operates at the threshold of the possible — turning vision into reality, transforming environments. Tempist's swarm technology is genuinely magical: autonomous, convergent, EMP-capable. Its outcomes exceed what the inputs logically seem to promise.

// "We are the weather" · Transformation language · Before/after framing

The Tension Creates Power: The Ruler says trust this because of its legitimacy. The Magician says trust this because it does things the uninitiated cannot fully comprehend. Together: the brand experience of a classified program. Authorized to know it works. Not authorized to know exactly how.

[CHAPTER 02 – TIER 1 / CONTROLLED MESSAGING]

VERBAL IDENTITY

Tagline Hierarchy · Messaging Architecture · Audience Frames · Lexicon · Boilerplate Copy — Do not modify without Brand Architecture sign-off.

02

[TAGLINE HIERARCHY - 2.1]

PRIMARY TAGLINE - CONFIRMED & ELEVATED - FOUR WORDS. ONE PERIOD. NO EXCEPTIONS.

We are the weather.

SECONDARY TAGLINES — CONTEXT-SPECIFIC

// INVESTOR / CAPITAL

*"INFRASTRUCTURE FOR THE THREAT ENVIRONMENT
YOU HAVEN'T MODELED YET."*

For sophisticated capital that understands infrastructure plays vs. point solutions.

// SOVEREIGN / GOVERNMENT

*"THE SKY ABOVE YOUR SOVEREIGN TERRITORY.
RECLAIMED."*

Speaks to territorial integrity — a restoration of sovereignty, not a product.

// OPERATIONAL / FIELD

*"AUTHORIZATION COMPLETE. INTERCEPT SEQUENCE
INITIATED."*

For procurement officers, special operations, and technical integrators.

[MESSAGING ARCHITECTURE - 2.2]

THREE-TIER MESSAGE HIERARCHY

T1

BRAND LEVEL - WHO WE ARE

Tempist Systems is the sovereign-grade autonomous counter-threat infrastructure company. Not a startup. Not a vendor. A new category of defense capability — the kind that changes what a government can guarantee its people.

T2

CATEGORY LEVEL - WHAT WE'RE CHANGING

The drone proliferation threat has outpaced every existing counter-UAV framework. T.E.M.P.I.S.T. closes that gap — not incrementally, but categorically. A \$400 drone now threatens a \$40M asset. The asymmetry ends here.

T3

PRODUCT LEVEL - HOW IT WORKS

T.E.M.P.I.S.T. deploys a coordinated swarm of EMP-equipped interceptors that detects, classifies, assigns, intercepts, and neutralizes aerial threats faster than any human controller can authorize — and resets for the next engagement without operator input.

MESSAGE FRAMES BY AUDIENCE

SOVEREIGN / GOVERNMENT BUYERS

SOVEREIGNTY INFRASTRUCTURE

This is not a defense purchase. It is a sovereignty infrastructure decision. Lead with: combat deployment, ITAR compliance, in-country manufacturing JV availability, EMP zero-debris advantage.

Sovereign deployment · Territorial integrity · Operational authority · In-theater proven

INSTITUTIONAL INVESTORS

INFRASTRUCTURE LAYER PLAY

Tempist is the infrastructure layer of the autonomous aerial defense market. Lead with: \$100M+ sovereign pipeline, manufacturing JV structure, platform architecture, directed energy roadmap.

Infrastructure play · Category-defining · Sovereign pipeline · Platform not product

DEFENSE CONTRACTORS / INTEGRATORS

INTEGRATION-READY SYSTEM

T.E.M.P.I.S.T. is designed for integration. Open architecture, ITAR structure, JV accessibility. Technical specs available under appropriate NDA and authorization.

Integration-ready · Spec-available · Compliance-structured · JV-accessible

INTERNAL TEAM

CLEARED FOR THIS MISSION

We are not building a company. We are building defense infrastructure that changes what nations can guarantee their people. Operational standards, not corporate standards.

Cleared for this · Mission-critical · Doctrine not policy · Historical stakes

[LEXICON - 2.4]

LANGUAGE OWNERSHIP

WORDS TEMPIST OWNS

T.E.M.P.I.S.T.	Full acronym always with periods
Swarm	Both threat and solution — duality intentional
Intercept sequence	Not "attack" or "response"
Sovereign deployment	Not "selling to governments"
Doctrine	Not "values" or "principles"
Cleared	"Cleared for this mission" — internal
In-theater	Always hyphenated
The weather	Tempist's presence and inevitability

WORDS TEMPIST AVOIDS

Innovative / Disruptive	Startup lexicon. Wrong register.
Next generation	Implies predecessor. New category.
Game-changing	Consumer sports language.
Excited / Passionate	Teams are committed, not excited.
Solutions / Ecosystem	Too generic / tech startup vocab.
Scale (as verb)	"Extend operational reach" instead.
Space (market term)	"Counter-UAV market" instead.
Startup	Tempist is a defense infrastructure company.

[BOILERPLATE COPY — 2.5]

APPROVED COPY — BY LENGTH

25-WORD VERSION

Tempist Systems builds T.E.M.P.I.S.T. — autonomous counter-UAV swarm infrastructure, combat-proven in Ukraine, engineered for sovereign deployment worldwide. We are the weather.

50-WORD VERSION

Tempist Systems Inc. develops T.E.M.P.I.S.T. — Tactical EMP Interceptor Swarm Technology — the autonomous counter-UAV platform engineered for sovereign-scale aerial threat neutralization. Combat-proven in Ukraine's active conflict theater, T.E.M.P.I.S.T. closes the engagement window before human reaction time becomes relevant. Built for governments. Designed for permanence. We are the weather.

LINKEDIN / WEBSITE ABOUT (150-200 WORDS)

The proliferation of commercial and military UAVs has created a threat class that existing defense frameworks were not designed to counter. A \$400 drone can now compromise a \$40M asset. Human reaction time — long the currency of aerial defense — is no longer a viable denominator.

Tempist Systems builds T.E.M.P.I.S.T.: Tactical EMP Interceptor Swarm Technology. An autonomous counter-UAV platform that deploys coordinated interceptor swarms, closes engagement windows before human controllers can respond, and resets for the next threat without operator input. Combat-proven. Ukraine-deployed. ITAR-structured. Sovereign-ready. Backed by Lockstep Ventures and Obsidian Capital Partners. \$100M+ sovereign pipeline. We are the weather.

[CHAPTER 03 - TIER 1 / VISUAL DOCTRINE]

VISUAL IDENTITY SYSTEM

Color · Typography · Logo System · Graphic Language · Photography Direction · Motion Principles —
All production materials require Brand Architecture approval.

03

[COLOR SYSTEM - 3.1]

BRAND PALETTE

OPS BACKGROUND #0A0B0E PRIMARY BLACK	SIGNAL GREEN #00FF41 OPERATIONAL ACTIVE	CLASSIFIED WHITE #E8E4DC PRIMARY TEXT	THREAT RED #CC1100 ALERT / INTERCEPT	STEEL BLUE-GREY #4A5568 COLD ATMOSPHERE	GHOST #FFF @ 4% TEXTURE / OVERLAY
OPS BACKGROUND All primary digital backgrounds, document fields, presentation masters. Not pure black — it has depth.	SIGNAL GREEN Used in ONE element per visual. Signal, not palette. Never placed on white. Never in large surface areas.	CLASSIFIED WHITE Primary text. The slight warmth of a classified document. Never pure #FFFFFF in any Tempist material.	THREAT RED Extreme restraint. Maximum 3% of any visual surface. Never decorative. Alert states only.	STEEL BLUE-GREY Secondary text, supporting data, inactive states. Never competes with Signal Green for priority.	GHOST Texture layer only. Maximum 10% opacity. Never as a solid color. Scanlines and noise only.

[TYPOGRAPHY SYSTEM - 3.2]

TYPE SYSTEM

PRIMARY - SPACE GROTESK - HEADLINES / WORDMARK / PRIMARY STATEMENTS

SPACE GROTESK

LIGHT WEIGHT - WE ARE THE WEATHER.

Weights: 300 / 400 / 500 / 600 / 700 · Google Fonts · Never italic in brand system

SECONDARY - IBM PLEX SANS - BODY COPY / DOCUMENTS / BRIEFINGS

IBM Plex Sans — Designed for institutional documentation and technical contexts. The document voice of Tempist briefings.

Weights: 300 / 400 / 500 / 600 · Google Fonts · For extended copy over 3 lines

MONOSPACE - IBM PLEX MONO - DATA / COORDINATES / UI READOUTS / SYSTEM VOICE

[TARGET: LAT 48.3794°N / LON 31.1656°E / ALT 185m]
[SN: TSI-2026-004712] // [STATUS: INTERCEPT_ACTIVE // NEUTRALIZED: 14]

Weights: 400 / 700 · Google Fonts · Bold for active states, Regular for historical data

[LOGO SYSTEM — 3.3]

PRIMARY WORDMARK + LOCKUP

TEMPIST SYSTEMS INC.

WE ARE THE WEATHER.

ABBREVIATED WORDMARK

TEMPIST SYSTEMS

ACRONYM TREATMENT

T.E.M.P.I.S.T.

TACTICAL · EMP · INTERCEPTOR · SWARM · TECHNOLOGY

PROHIBITED TREATMENTS

- // Do not alter the typeface from Space Grotesk Bold
- // Do not place the wordmark in Signal Green
- // Do not add drop shadows, glows, or 3D effects
- // Do not stretch or distort horizontally or vertically
- // Do not rotate — appears at 0° only
- // Do not place on patterned or photographic backgrounds without approval
- // Do not animate outside specified Motion Principles
- // Do not surround with decorative elements
- // Do not embed the primary tagline within the logo lockup
- // Do not reproduce below 40mm / 160px width

CLEARSPACE RULE

Minimum clearspace = height of the capital T in "TEMPIST" on all four sides. No element may intrude.

[SYMBOL MARK — 3.3]

CONVERGENCE ICON

CONVERGENCE ICON — SIGNAL GREEN ON OPS BACKGROUND

DESIGN BRIEF FOR DESIGNER

- // 8 equidistant vector lines originating outside the center circle, converging toward center
- // Each line fades to 0% opacity 15-20% before reaching the center point — the visual of arrival without completion
- // Center ring: 1:8 ratio to overall mark diameter, slightly thicker on western arc (suggests activation)
- // No arrowheads, no decorations — geometry communicates directionality
- // Vector lines range 85–100% of max radius — variable lengths represent distributed interceptor travel distances converging simultaneously
- // Single color only — Signal Green on Ops Background (primary) or Classified White (secondary)

SYMBOLIC INTENT

Multiple autonomous interceptors reaching simultaneously-assigned targets from different vectors. The mathematical limit approaching zero — the closing of distance between threat and intercept, from multiple directions simultaneously.

[GRAPHIC LANGUAGE — 3.4]

VISUAL SYSTEM ELEMENTS

GRID OVERLAYS

TARGETING RETICLES

0.5px lines. Signal Green 10-18% opacity. Full-bleed or corner-anchored. Slight offset — an operational scan, not decorative gridwork. Background element only.

CORNER BRACKETS

FRAME ELEMENTS

1px sharp 90° corners. Arm length 12-40px. Signal Green = active content. Steel Blue = supporting. Content framed = important. Never decorative.

DATA READOUTS

SYSTEM VOICE

IBM Plex Mono. Square brackets. Items separated by //. Signal Green = active data. Steel Blue = historical. Real or operationally plausible data only.

REDACTION DEVICE

SELECTIVE DISCLOSURE

Black-bar redaction. [CLASSIFIED] in Threat Red. Bars must completely cover content — partial redactions prohibited. Editorial use only, never in legal documents.

SCANLINE TEXTURE

GHOST OVERLAY

1px horizontal lines, 4-6% opacity, 2px pitch. Applied to backgrounds only. Never on typography. Maximum 8% before becoming distraction.

SWARM VISUALIZATION

COORDINATED VECTORS

Small equilateral triangles, direction-pointing. Coordinated vectors converging on designated targets. Order from distributed intelligence — never organic, never random.

EMP PULSE RINGS

SIGNAL ELEMENTS

Concentric circles expanding from origin. Line weight decreasing outward. Opacity 80% to 0%. Signal Green. Maximum 1pt stroke. Follows physics of wave propagation.

CLASSIFICATION STAMP

AUTHORITY MARK

IBM Plex Mono Bold. Threat Red border. Top-right covers, bottom-left interiors. Watermark at -45°, 6-8% opacity. Only on materials with content worthy of the notation.

[CHAPTER 04 – TIER 2 / PRODUCTION STANDARDS]

APPLICATION GUIDELINES

Document System · Presentation System · Digital Presence · Physical & Environmental — Approved
for cleared production personnel.

04

4.1 CLASSIFIED BRIEFING FORMAT

TEMPIST SYSTEMS INC.

DOC: TSI-2026-000147

PAGE: 1 OF 24

DOCUMENT TITLE

BODY CONTENT AREA

CONTROLLED DISTRIBUTION

TSI-2026-000147

- // Page number always shows [N] OF [TOTAL] — never page alone
- // Serial numbers: TSI-[YEAR]-[6-DIGIT SEQUENCE]
- // Classification stamp: top-right cover, bottom-left interior
- // Watermark: center, -45°, 6-8% opacity, all interior pages

4.2 PRESENTATION MASTERS

DARK-FIELD PRIMARY (DEFAULT)

Ops Background. IBM Plex Mono header/footer. Corner brackets Signal Green upper-left only. Ghost scanline 4%. Grid overlay Signal Green 10% behind all content.

LIGHT-FIELD VARIANT (GOVERNMENT FORMAL)

Classified White background. All typography in Ops Background. No scanline or grid overlay. Classified feel through typography and structure alone.

INVESTOR VS. GOVERNMENT BRIEFINGS

Investor: slightly more whitespace, Lockstep/Obsidian co-branding visible. Government: denser, more technical, classification stamps prominent. Light-field variant available.

4.3 DIGITAL PRESENCE

Landing on tempist.com should feel like gaining authorization to a system that was running before you arrived. The visitor does not browse — they receive a briefing. Environmental state loads first: dark field, atmospheric, timestamp initiating, coordinate populating. Navigation is a document index, not a consumer menu.

LINKEDIN DIRECTION

- // Dark-field graphics only — no stock drone photography
- // Infrequent and deliberate — quality over frequency
- // Every post reads like it was declassified for specific release
- // No congratulatory content, no team culture posts
- // Submit button: "SUBMIT REQUEST" — never "Send"

4.4 PHYSICAL & ENVIRONMENTAL

CHALLENGE COINS

40mm antique brass. Black enamel field. Convergence Icon obverse, "WE ARE THE WEATHER." reverse. Ridged edge — no smooth edge. Operational tokens, not decorative.

TRADE SHOW ENVIRONMENT

Black draped walls — no open perimeter. Low cool-temperature operational lighting. Large-format dark-field display. Briefing packets not brochures. No background music.

VEHICLES & HARDWARE

Matte black only. Wordmark decal 150mm, rear-left. Hardware in matte black Cerakote/powder coat. Engraved serial number plates — no consumer product labeling.

[CHAPTER 05 – TIER 1 / OPERATIONAL STANDARDS]

BRAND GOVERNANCE

Tier Classification · Co-Branding Rules · The 10 Brand Laws — Compliance mandatory. Violations
require formal after-action review.

05

[THE 10 BRAND LAWS – 5.3]

THESE ARE NOT GUIDELINES. THEY ARE OPERATIONAL ORDERS. VIOLATIONS REQUIRE A FORMAL AFTER-ACTION REVIEW.

LAW 01 THE WORDMARK IS NOT A DESIGN ELEMENT

The wordmark is an authorization stamp. It appears once per visual surface, in its specified form, in its specified color, at its specified minimum size. That is all.

LAW 02 SIGNAL GREEN IS A SIGNAL, NOT A PALETTE

Signal Green communicates one thing: the system is active. In any given visual, Signal Green may appear in one element at a time. If you have used it on two elements, you have used it incorrectly.

LAW 03 PRECISION IS NOT OPTIONAL

Every specification — clearspace measurements, tracking values, opacity percentages, color codes — is not a suggestion. The brand communicates precision by being precise. Approximate compliance is a violation.

LAW 04 NEVER EXPLAIN THE JOKE

Tempist communications do not contain meta-commentary or footnotes interpreting the brand aesthetic. The brand is what it is. Audiences either understand it or they are not the audience.

LAW 05 THE BRAND HAS NO OPINIONS ABOUT THE COMPETITION

No competitor is named in any Tempist communication. No competitive comparison is made. The brand does not acknowledge that alternatives exist. Tempist's confidence does not require contrast.

[THE 10 BRAND LAWS - 5.3 CONTINUED]

LAW 06 URGENCY IS A WEAKNESS

If a Tempist communication expresses urgency — "act now," "limited availability" — it has failed. Urgency is the language of entities that need a decision before the audience has time to think clearly.

LAW 07 DATA IS NOT DECORATION

Every coordinate, serial number, timestamp, and data readout in Tempist materials is real or operationally plausible. Fake data used for decorative effect is a violation. The brand's data aesthetic is only powerful if it is true.

LAW 08 THE VOICE IS UNIFORM ACROSS ALL CHANNELS

There is no "casual" Tempist. There is no "friendly" Tempist for social media. The voice may modulate in register but the fundamental characteristics — declarative, precise, sovereign, cold-certain — do not change.

LAW 09 THE CLASSIFICATION IS NOT THEATER

Materials with classification stamps must contain information worthy of that notation. Materials that use the classified aesthetic but contain no meaningful content violate the brand's fundamental claim to operational seriousness.

LAW 10 WE ARE THE WEATHER

The tagline is a declaration of category. Materials that fail to carry the full weight of the brand — that approximate rather than execute — do not make the weather. They get wet.

[CHAPTER 06 – TIER 1 / FOUNDATIONAL NARRATIVE]

BRAND NARRATIVE ASSETS

Origin Story · The Enemy · The World Without / With · Key Proof Points — For investor presentations, leadership communications, and brand storytelling.

06

[THE ORIGIN STORY — 6.1]

THE ORIGIN STORY

There was a moment — not in a boardroom, not in a funding round — when the nature of the threat changed.

The proliferation had been building for years. Commercial drone technology had democratized a capability that, until recently, required military acquisition, specialized training, and sovereign authorization. Then: a \$400 device became a viable weapon. A swarm of \$400 devices became a threat that no nation-state air defense system had been designed to counter. The rules of aerial sovereignty — built over a century of conventional airpower doctrine — became inadequate overnight.

Precision Tek Inc. had been working in the margins of this problem — the places where standard defense procurement had not yet reached. The engineers and operators who built what became T.E.M.P.I.S.T. were not academics solving a theoretical challenge. They were responding to a real tactical problem, in real operational environments, before the defense establishment had even fully named the threat class.

When that answer was deployed — in Ukraine, in the world's most advanced live laboratory for drone warfare — and it worked, the company changed its name. Not because Precision Tek was inadequate. Because what they had built was something else entirely. Something that doesn't ask if you're ready. Something that arrives.

We are the weather.

[NARRATIVE FRAMES – 6.2 / 6.3 / 6.4]

6.2 THE ENEMY

The enemy is not a country. It is the gap — the gap between the speed at which threat technology proliferates and the speed at which sovereign defense capabilities can respond. The same logistics networks that deliver commercial goods have delivered drone swarm components to entities who were never the intended adversaries of the defense frameworks charged with stopping them. The gap is the enemy. Tempist is the closure.

6.3 WORLD WITHOUT TEMPIST

The proliferation continues. Every year, the barrier to deploying an aerial swarm decreases. A \$400 drone can force the rerouting of a commercial flight, the evacuation of a critical infrastructure site, the exposure of a forward operating position. Sovereign governments lose ground to frameworks that were never designed for this threat. The gap grows every day Tempist is not deployed.

6.4 WORLD WITH TEMPIST

The world with Tempist is not a world without threat. It is a world where the threat meets its match before it reaches its target. An adversary calculating the feasibility of a drone-swarm attack is calculating against a system that does not tire, does not hesitate, and does not negotiate. Before Tempist. After Tempist. These are not the same threat environments.

[KEY PROOF POINTS — 6.5]

WHAT MAKES THE CLAIM CREDIBLE

[01] **COMBAT DEPLOYMENT — UKRAINE**

T.E.M.P.I.S.T. operationally deployed in the Ukraine conflict theater — the world's most data-rich, highest-tempo environment for counter-UAV doctrine. Not a field test. Combat deployment.

[02] **\$100M+ SOVEREIGN PIPELINE**

Documented sovereign procurement pipeline in excess of \$100M — representing identified, qualified interest from nation-state governments in formal procurement evaluation. Not speculative.

[03] **AUTONOMOUS ENGAGEMENT — ZERO HUMAN LATENCY**

Detection, classification, assignment, and intercept executed autonomously within engagement windows that human operators cannot access.

[04] **EMP PAYLOAD — ZERO KINETIC DEBRIS**

EMP-based intercept eliminates kinetic debris risk endemic to projectile-based systems. In urban environments and airspace-constrained theaters, this is not a feature — it is a requirement.

[05] **MANUFACTURING JOINT VENTURE ARCHITECTURE**

In-country manufacturing JV capacity for qualifying sovereign partners — enabling local production compliance, technology transfer, and in-country economic engagement that accelerates procurement authorization.

[KEY PROOF POINTS — 6.5 CONTINUED]

[06] ITAR COMPLIANCE TRACK

Export control architecture built into the procurement and deployment structure from the outset — not a post-design compliance retrofit. This is foundational architecture, not added compliance.

[07] GAMI PATHWAY

Active General Authority for Military Industries compliance pathway enabling sovereign deployment within regulatory frameworks for key strategic markets.

[08] DIRECTED ENERGY ROADMAP

T.E.M.P.I.S.T. is a platform, not a product. Current EMP interceptor swarm is capability tier one. Active directed energy development extends the platform into the next threat generation.

[09] INSTITUTIONAL CAPITAL — LOCKSTEP VENTURES / OBSIDIAN CAPITAL PARTNERS

Backed by investors at the intersection of defense strategy and long-duration capital — reflecting the infrastructure-scale positioning of T.E.M.P.I.S.T.

[10] DISTRIBUTED AI — NO SINGLE POINT OF FAILURE

Swarm coordination on distributed AI architecture — no central command node to target or disable. Each interceptor carries sufficient autonomous intelligence to complete its intercept sequence even without network connectivity.

TEMPIST SYSTEMS INC.

We are the weather.
